

**AN EXCITING NEW
PROCUREMENT PROGRAM
FROM THE EXPERTS AT:**

RoofSMART™ by Moisture Management is a revolutionary program designed to serve the needs of public schools and their roofing asset management challenges. RoofSMART is an approved procurement program through the Educational Service Centers of Indiana and offers a variety of components you can pick and choose from to tailor the program to your specific needs. Currently, there are over 6,000,000 sq. ft. of school system roofing assets in the RoofSMART program.

The RoofSMART program offers numerous components and benefits, but was designed to accomplish the following four main objectives for public school officials that manage facility roofing assets:

Each RoofSMART member, upon joining the program, receives a full roof assessment audit and 5-year Strategic Plan (including an immediate repair checklist and budgets) conducted by Moisture Management's team of qualified roofing consultant professionals. Once enrolled in the RoofSMART program, you can choose additional components and features to tailor the program to your unique needs, such as preventative maintenance programs (MoistureGuard), roof leak management (C.A.L.M.), legal services, architectural and engineering design services, and much more!

In order to put the RoofSMART program to work for you, contact either your local Indiana Educational Service Center or call Moisture Management directly at 317-577-0910. One of our qualified roofing consultants will explain the program, benefits, and how YOU can save thousands of dollars on capital projects and leak calls, increase the life of your existing roofs, and manage your roofing inventory with confidence, supported by scientific and historic data. Call Moisture Management today!
